STAUFF Product Overview

For more than 50 years, the companies of STAUFF Group have been developing, manufacturing and distributing pipework equipment and hydraulic components for mechanical and plant engineering and for service and industrial maintenance.

In addition to mobile and industrial hydraulic machinery, Typical applications also include commercial and special purpose vehicles, rail transportation and energy technology. Likewise, STAUFF products are used in marine, oil and gas applications and in the process, food and chemical industries.

The overall range currently includes about 50000 standard products as well as numerous special and system solutions according to customer's specifications or based on our in-house development.

All STAUFF products undergo relevant testing in accordance with international regulations and are governed by the high standards of the in-house quality management system. Furthermore, many items have received certifications and approvals from various international institutes, organisations and authorities who have independently confirmed the quality and performance of the products.

Wholly-owned manufacturing, sales and service facilities in 18 countries and a tight global network of authorised distribution partners ensure high presence and service paired with a maximum of availability.

Quality Management – ISO 9001:2015
 Environmental Management – ISO 14001:2015
 Safety Management – ISO 45001:2018
 Energy Management – ISO 50001:2018

Our Strengths – Your Advantages

- Direct sourcing from a single manufacturer
- Acknowledged expertise in technical consulting
- Special products and system solutions according to customer parameters
- Permanent quality monitoring and improvement
- Permanent storage of common items
- Optimised purchasing through the use of intelligent supply models
- Global availability in all industrial regions
